2. Discussion of Recommendations for the MMR Report

Draft recommendations developed in the June meeting were further discussed. Additions included:

- Screening during prenatal care and postpartum for social determinants of health
- Internal review of severe maternal morbidity by each delivery hospital
- Review of birth outcomes, severe maternal morbidity, quality metrics and patient satisfaction by racial stratification

A final draft of recommendations from this discussion is attached. Final approval by the Group will be done by email.

The next meeting will be **Monday December 9, 2019 from 2:00 to 4:00 pm.**

Respectfully submitted,
